Checklist of Actions to take when Earthquake strikes!

※ Pay attention to the emergency earthquake warning relayed through the speakers.

1. Take personal protective action for one minute to reduce chance of injury (see the figures below).
2. Evacuate from the building to a nearby safe space outside (temporary evacuation area) using the designated evacuation route.
3. Upon arrival at the temporary evacuation area, report your presence to the person in charge.

3 steps to take personal protective action!

1. DROP to the ground.
2. COVER yourself by getting under a sturdy desk or table.
3. HOLD ON until the shaking stops.
