Objective

- To make an preparation for evacuation of a large-scale earthquake, and to improve students and faculty awareness of disaster prevention consciousness.
- To confirm an organized activity to minimize further damage.

Target persons

Department heads and administrative staff (about 20% from each department), as well as students, faculty, co-op staff, cleaning staff, etc. who wish to participate.

However, the number of participants will be limited to a smaller number than in previous years in order to prevent coronavirus infection. (Students and faculty members who are in the middle of a lecture are not required to participate. Students and faculty members who are not in class can participate.)

Assumption

An earthquake with an intensity of upper six on the Japanese seven-stage seismic scale strikes Kanazawa. The Earthquake Early Warning (EEW) is a warning issued. After 10 seconds of the warning, strong tremors arrive and continue about one minute. Although the entire infrastructures stop working, communication network systems are secured by emergency power supply.

Contents of Evacuation Drill

- Every student and faculty evacuates at once from areas in danger and moves promptly to designated areas.
- University Staff organizes a disaster operations center, carries out practice drills and confirms a chain and unity of command.
- University Staff organizes a self-defense fire-fighting organization and carries out fire drills.
- Firefighting activities and rescue drills take place by the Kanazawa Central Firehouse.

Confirmation method of the number of refugees

University Staff counts the number of evacuees.
◆ Timetable

**Target**

Department heads and administrative staff (about 20% from each department), and students, faculty, co-op staff, cleaning staff, etc. who wish to participate.

(In order to prevent coronavirus infection, students and faculty members who are in the middle of a lecture are not required to participate.)
